

SleepFighter Release Notes v1.0

General

- You can toggle on/off challenges for all alarms in the starting screen
- You can now emergency cancel an alarm (semi-hidden, found in the actionbar)
- You can now try out challenges from the challenge settings
- It is possible to include and exclude areas where alarms are supposed to go off or not via GPS

Global Settings

- There is a developers section in the global settings now.

Alarm Settings

- There is now a setting for making the alarm read out the time and weather when it goes off
- There is now a settings menu for configuring the settings of the challenges
- You can now change the volume of an alarm

Challenges

- Added a shaking challenge
- Added a some harder math challenges
- Added “RotoSnake” challenge
- Completing challenges will now award challenge points (max once per 6 hours), which will get removed when snoozing or emergency cancelling an alarm

Bug Fixes/Changes

- Application will not crash anymore when pressing the up-button when in subsettings to the alarm settings
- The challenges now handle rotation properly
- You will not be automatically sent to the alarm settings when creating a new alarm anymore

Known Issues

- Text-to-speech not working properly
- RotoSnake does not work properly when device is parallell to ground
