As a person that needs to do things fast in the morning, I want to be informed of my immediate environment via speech.			Eric	DONE		
As a person that needs to do things fast in the morning, I want to be informed the time of day via speech.			Eric	DONE		
As a person that doesn't have time to look out the window I want to be informed of the weather in order to pick appropriate clothing.			Eric	DONE		
As a person that sleeps deep and don't respond to sound nor vibration, I want the flashlight to activate when the alarm goes off.				DONE		
	Check if the current phone has flashlight		Danny	DONE	2013-10-09	Danny
	Make it light up the room when the alarm goes on		Danny	DONE	2013-10-11	Danny
	Add setting (enable/disable) for flash		Danny	DONE	2013-10-15	Danny
As a user I want to have the alarm increase in volume over time, so I can wake up at as low volume as required, in order to not disturb other people in my environment, but also ensure that I cannot ignore the alarm for too long.				SCRAPPED		
	Have option in GUI to enable/disable					
	Store in model and persist					
	Actually handle ramping for ongoing audio	Probably needs threading. Done by "manager" type class using setvolume on current driver? Or by drivers individually?				
As a person who risks failing to wake up due to snoozing, I want my alarm to ring louder and louder for every time I press "snooze".		How would this work in conjunction with other volume ramping? One or the other?	Eric	SCRAPPED		
As a person I want to select an internet stream to be played when an alarm goes off, in order to wake up to my favourite online broadcast.			Mazdak	DONE		
As an experienced mathematician I want to set the degree of difficulty.			Eric	DONE
